Question 5

(d) The object `mydf` is a tibble, with classes `tbl_df`, `tbl`, and `data.frame`. The variable `mydf$date` is stored as a character variable.

(e) The first rows of the dataframe output shows the variables; `date`, `description`, `lang`, `category1`, `category2`, and `granularity`.

Question 6: sparklyr errors

I tried to install the `sparklyr` package a couple of times but when I ran the R script, loading the package reported the error `Error in library(sparklyr):there is no package called 'sparklyr'` then `Execution halted`. I could not run the script in the OSCER environment.

Question 7: Data sources

- **ITU ICT Indicators**
 - Internet users (% population)
 - Fixed and mobile broadband subscriptions
 - Network coverage
- **UNDP Human Development Data**
 - Human Development Index
 - Education index
 - Income index
 - Inequality measures
- **NASA POWER API**
 - Temperature
 - Precipitation
 - Solar radiation
- **Alpha Vantage API**
 - Stock prices

- Company financial indicators such as revenue, earnings
- Economic indicators such as inflation, interest rates
